We Love Last Week's Pull-Back!

On Monday, the Dow soared a mind-blowing 235 points. That translates to a whopping one day surge of 2.8%. Meanwhile, the broader S&P 500 jumped even higher: 3.1% to 910. And as we write this today the Dow is up another 100 points and the S&P another 15.

Questions & Answers

Q: What is fundamental analysis and how do you use it?

Fundamental analysis tries to find the value of a security by looking at the basics of a company's operations, products, and management. Factors that play a big role are trends in sales, profits, and product development. How well the company is positioned in the marketplace, its relation with competitors, and the broader forces in the economy are also [Read more...](#)
